

## Commercially sensitive projects – recommendation for CREST Gold

Student/team members' names	
Project title	
Project supervisor name	
Project supervisor role	

I have supervised the above student(s) on the above project, which is of a commercially sensitive nature. In order to work on this project, the student(s) have signed a non-disclosure agreement, and therefore are unable to submit a project report for their CREST Gold Award. I can confirm that their project meets the CREST Gold criteria as outlined below.

Signed \_\_\_\_\_

Date \_\_\_\_\_

NB. For Gold we expect 70+ hrs on one project area with skills/knowledge of 16 – 18 years

Criterion	Assessment Tick if met, add comments as feedback
<b>1 – Planning the project</b>	
The students set a clear aim for the project and broke it down into smaller objectives	
The students explained a wider purpose for the project	
The students identified a range of approaches to completing the project	
The students described their plan for how to complete the project and why they chose that approach	
The students planned and organised their time well	

2 – Throughout the project	
The students made good use of the materials and people available	
The students researched the background to the project and referenced their sources appropriately	
3 – Finalising the project	
The students made logical conclusions and explained the implications for the wider world	
The students explained how what they did affected the outcome of the project	
The students explained what they have learned and reflected on what they could improve	
4 – Project-wide criteria	
The students showed understanding of the science behind their project, appropriate to their level	
The students made decisions to direct the project, taking account of ethical and safety issues	
The students showed creative thinking in carrying out the project	
The students identified and overcame problems successfully	
The students explained their project clearly, in both writing and conversation
